Computer Science Bingo

The following page contains a bingo card full of computer science-related questions. Instead of “BINGO” we have “CsFAST”, where each column contains questions related to the topic in the title.

Your goal will be to get BINGO (or CsFAST) by covering up five items in a row, column, or diagonally across the board. How do you cover a spot? Answer the question in the box! Write each answer to the questions on the pages following the CsFAST bingo card OR use a separate Word document to type your answers. You are welcome to print this document as well (and then scan/submit). Do whatever is easy for you!

Once you get BINGO, answer the last question of “What was your FAVORITE question and WHY?” Then submit this document to our “completed assignment” site at:  
https://tinyurl.com/CS-FAST-Assignments

We’ll discuss this assignment (as well as any interesting facts you learned through your search for answers to our BINGO questions) during our upcoming Coffee Time.

If you want an extra challenge, go for a blackout board! A blackout in BINGO means you cover every cell on the board. If you get a blackout, please brag about it during our CS-FAST Coffee Time!

If you get stuck, don’t hesitate to ask for help (cstart@mines.edu)! And most importantly… have fun!

1. Who was the first computer programmer?

2. When was the first computer created and what was it?

3. What is Moore’s Law?

4. How were the first computer programs written?

5. What is a computer without electricity?

6. What percent of the world uses a computer daily?

7. How many smartphones are sold every year?

8. What is the programming language Python named after?

9. Do all computer scientists program?

10. What percentage of STEM occupations are in computing?

11. How are computers used in Linguistics?

12. What is computer science doing for health and medicine?

13. Android or Apple? PC or Mac? (Your preferences)
